

II. SYMPOSIUM OF YOUNG RESEARCHERS ON PHARMACEUTICAL TECHNOLOGY, BIOTECHNOLOGY AND REGULATORY SCIENCE

23-24 JANUARY 2020

SZEGED
Hungary

General Information

Date: 23-24 January 2020

Location:

Registration: Faculty of Pharmacy, University of Szeged
(6 Eötvös street, Szeged, Hungary, H-6720)

Symposium: Department of Rector's Office, University of Szeged
(13 Dugonics square, Szeged, Hungary, H-6720)

Congress Topics: Pharmaceutical technology, biotechnology and regulatory science

Oral presentations (10 min) followed by discussions (5 min)

DOI: [10.14232/syrptbrs.2020.af](https://doi.org/10.14232/syrptbrs.2020.af)

Edited by: Tivadar Bíró

President of the Symposium

Ildikó Csóka

Organiser

University of Szeged, Institute
of Pharmaceutical Technology
and Regulatory Affairs

email: gytfti.phd@pharm.u-szeged.hu

Co-organisers

Foundation for the
Development of Pharmacy
Education in Szeged

Kabay János College
for Advanced Studies

Committees

Head of Scientific Committee

Piroska Szabó-Révész

Scientific Committee

Anita Kovács, Hungary
Attila Gácsi, Hungary
Dorina Dobó, Hungary
Edina Pallagi, Hungary
Edina Vranić, Bosnia and Herzegovina
Erzsébet Csányi, Hungary
Gábor Katona, Hungary
Géza Regdon jr., Hungary
Ioan Tomuță, Romania
Jelena Parojčić, Serbia
Katalin Kristó, Hungary
Klára Pintye-Hódi, Hungary
Krisztina Ludasi, Hungary
Orsolya Jójárt-Laczkovich, Hungary
Mária Budai-Szűcs, Hungary
Mihály Kata, Hungary
Mirjana Gašperlin, Slovenia
Piroska Szabó-Révész, Hungary
Rita Ambrus, Hungary
Senka Vidović, Serbia
Szilvia Berkó, Hungary
Tamás Paál, Hungary
Tamás Sovány, Hungary
Zdeňka Šklubalová, Czech Republic
Zoltán Aigner, Hungary

Head of Organising Committee

Tivadar Bíró

Characterization of chitosan/xanthan polyelectrolyte complex carriers: Influence of drug encapsulation procedure on *in vitro* release kinetics

Ana Ćirić, Ljiljana Đekić

Department of Pharmaceutical Technology and Cosmetology, University of Belgrade - Faculty of Pharmacy, Vojvode Stepe 450, 11221 Belgrade, Serbia

Chitosan/xanthan polyelectrolyte complexes (PECs) are considered promising oral drug delivery carriers due to nontoxicity, biodegradability and can be investigated as potential carriers for extended drug release [1,2]. Ibuprofen has short half-life ($t_{1/2} \sim 2$ h) and requires frequent administration of immediate release dosage forms [3]. The aim of this study was to investigate the influence of the ibuprofen encapsulation procedure on its *in vitro* release kinetics. Dried PECs, prepared with chitosan solutions adjusted to pH 4.6 using acetic acid, and ibuprofen dispersed in the xanthan solution before (4.6B) or added after (4.6A) the complexation of polymer aqueous solutions, comprising 100 mg of ibuprofen, were filled into size 0 capsules. *In vitro* release profiles in the paddle apparatus (50 rpm) (Erweka DT70, Germany) were obtained using 900 ml of phosphate buffer pH 7.2 at 37 ± 1 °C. Both samples showed extended ibuprofen release during 12 h. From 4.6B 100% of ibuprofen was released after 12 h. From 4.6A $66.41 \pm 2.14\%$ of substance was released after the same time. Ibuprofen release from the samples followed the *Korsmeyer-Peppas* kinetics and the release mechanism was a combination of swelling, erosion and diffusion ($0.5 < n < 1$). PEC 4.6B showed better control of ibuprofen release and its preparation conditions are considered optimal for controlled extended drug release.
